

THE CLAW SERIES QUICK RELEASE CRADLE

The Claw, the next generation of quality SECO all-metal collector/controller cradles. The streamlined design of these new cradles fit the body of a collector/controller snugly with simple, comfortable locking on the bottom of the cradle. The new design utilizes an 'anti-crush' feature that locks up the cradle when tight, but is limited — the risk of damaging controller is greatly reduced.

Item	Description	MSLP
5200-050	TSC2, Ranger 300/500	79.95
5200-052	Allegro, Explorer, Jett	79.95
5200-053	Recon	79.95
5200-054	FC100, MMCE	79.95
5200-055	FC1000/2000	79.95
5200-056	GMS-2	79.95
5200-057	Archer	79.95

THE CLAW SERIES BALL-AND-SOCKET POLE AND CLAMP CRADLE

The Claw, the new design utilizes an 'anti-crush' feature that locks up the cradle when tight, but is limited — the risk of damaging controller is greatly reduced. These new cradles are constructed of corrosion-resistant anodized aluminum and the stainless steel clamp screws feature non-jamming coarse threads for easy open and close use

THE "5199-SERIES" BALL-AND-SOCKET COLLECTOR/CONTROLLER BRACKET

This bracket integrates the cradle and clamp into one, flexible bracket solution. The link between the ball-and-socket sleeve allows for an almost unlimited range of movement. It also acts as a shock absorber.
