

KIP 1900 Copier

The new low-cost KIP 1900 copier combines high quality performance with maximum reliability. Based on mono-component toner technology, the KIP 1900 provides operators with clear copies from a wide variety of originals and media types. KIP 1900 operators benefit from dual exposure controls, enabling easy production of single or multiple copies from its integrated, automatic roll feed media supply.

Features:

- Copies 3 'D' size prints per minute
- Automatic roll feed
- Self-diagnostic systems
- Copy receiving tray
- Copies onto bond, vellum or film
- Up to 19 copies from one original

Digital Copy System

Digital Copier + Network Printing System

Digital Copier + Network Printer + Scan-to-File System

Mono/Color Copying

Touch screen user interface provides easy operation • 1 or 2 roll digital copy system with integrated front copy stacker • Produces 6 'D' size monochrome copies per minute • High resolution, 24-bit color copying technology • Integrates with inkjet printers to produce color copies • Tracks all usage data for accounting/billing purposes

Network Printing

Fully integrated 1 or 2 roll digital copying and network printing system
 Network printing from unlimited number of remote workstations
 Complete printing software and application driver included
 Integrated IPS system ensures high quality printing
 Operates at 4 'D' size prints per minute
 Field upgradeable to Scan-to-File system at any time!

Mono/Color Scanning

Touch screen user interface provides easy operation
 Selectable resolution - up to 600 dpi optical
 High resolution, 24-bit color scanning technology
 Automatic quality settings ensure top quality images
 Scan directly to a variety of file formats, including TIF, PDF & DWF
 Real time image preview provides instant quality assurance
 Fully integrated system design eliminates the need for additional PCs
 Integrates with inkjet printers to produce color copies
 Tracks all usage data for accounting/billing purposes

Print System

- KIP PrintNET - web-based printing and queue management
- KIP Request - network printing
- Automatic file format detection
- Integrated Windows and AutoCAD drivers
- Integrated DWF format support

Print & Copy System

- Collated set copying of unlimited originals
- Automatic image quality settings
- Real-time copy preview for quality control
- Integrated operator authorization system

Print, Copy & Scan System

- Create single and multi-page files from a variety of originals
- Preset quality selections for line/photo, grayscale and photo original
- Name scanned image files at the touch screen operator panel
- Disk use gauge displays free hard drive space for scan storage

Mono/Color Print, Copy & Scan System

- High resolution, 24-bit color copying and scanning technology
- Automatic copy and scan quality presets for easy operation
- Fully integrated design with no additional PC required
- Disk usage gauge displays free hard drive space for scan storage
- 8 D-sized prints per minute
- 2-4 roll capacity

High Demand Production Systems

KIP 7000 series systems are exceptionally powerful print, copy and scan solutions that provide high demand users with the ultimate in imaging technology and production speed. All KIP 7000 systems feature a full suite of state of the art printing, copying and scanning software to ensure excellent performance across all monochrome and color imaging applications.

In addition, the integrated KIP Image Processing Software suite delivers a wide range of printing benefits; including web-based & network printing, application drivers, automated metering, remote system monitoring and simple user operation.

The KIP 7000 is available in three main configurations:

- KIP 7000 Print System
- KIP 7000 Print, Copy & Scan System
- KIP 7200 Production System

Features:

- Available as network printer and monochrome/color digital copier & scan system
- Production printing speed of 13 'D' size per minute
- Network and web-based printing software and application drivers
- One-touch mono & color copying to KIP 7000 and inkjet printer
- 100% toner efficient operation with KIP Award winning HDP Plus Technology
- One-touch mono & color scanning
- Touch screen user interface provides all system functions
- 4-roll capacity
