

Océ TCS500 Color Print, Copy and Scan System

Fastest color CAD system available today
E-size color plot in just 60 seconds, B&W in just 40 seconds

Highlights

- True concurrency — processing, printing, copying and scanning at the same time
- "One-touch" copying and scanning
- Change media and ink tanks while the Océ TCS500 is printing
- Finishing capabilities accommodating up to 200 E-size plots
- Upgradeable as needs develop and grow—start with a printer and add copying and scanning

Features

What happens when you need to print a document that contains lines, text and images on the same page? You have to make a decision. If you choose to print the best quality to accommodate the image, you give up print speed. If you choose to print faster to accommodate lines and text, you compromise the print quality of the image. Now, there's no trade-off at all between crisp, rich color output and the ability to meet uncompromising deadlines with the Océ TCS500.

- Océ Dynamic Switching technology simplifies printing
- Convenient color management gives you full control of your color output
- Fast file processing and full queue control shortens printing time
- Océ Image Logic® delivers superior image quality
- "One touch" copying and scanning

Océ TDS100 Analog Copier

Large format plain paper copiers — instant, high-quality copies where and when you need them

It's a digital age. But you still need copies: from hard-copy originals, inkjet plots or corrected drawings. With the Océ TDS100 large format copier, you can make all those copies — easily, high quality and exactly when you need them. The Océ TDS100 can reduce costly outsourcing while it puts you in control of your schedule. And, its great design makes it a perfect fit for every working environment.

Highlights

- Produce copies at 10 linear feet per minute
- Océ Radiant Fusing technology means no warm-up time/waiting

Features

- Easy to operate
- Originals or copy media can be fed first. Quickly and easily copy onto opaque and transparent materials from a variety of originals. Even poor quality or thick originals with filing strips can be accommodated.
- Clean toner refill
- Océ's closed toner system can be refilled without leaving residue.
- Easy for your workplace

The Océ TDS100 can be located virtually anywhere in the work area — even adjacent to drawing tables or CAD stations because odor, noise and heat emissions are minimal. Modular design means you can choose the configuration that perfectly matches your needs: either tabletop or floor-standing.

Océ TDS320 Digital Multifunction System

Efficient, economical large format digital system for printing, copying, and scanning.

Highlights

- Now with scan-to-file and copy set processing!
- Multiple functions – print, copy, or scan your documents
- Effortless workflow – green button for easy copying and collating
- High-quality 600 dpi output
- Instant-on – always ready when you need it
- Proven reliability and efficiency

Features

- Copy/scan once, print many
- Breakthrough Print Quality
- Océ Image Logic® technology offers superior copy quality
- Océ Power Logic® controller for centralized process management
- Zero warm-up time means no waiting for your prints
- Proven reliability minimizes downtime

Océ TDS450 Digital Multifunction System

The benchmark system in entry level digital copying, printing and scanning

Highlights

- Flexible configurations – fits into your environment
- Enhanced communications with advanced scanning options
- Optimized workflow – increases productivity
- High-quality 600 dpi output
- Intuitive interface – saves time and effort
- Fast – 2 E-size prints per minute

Features

- Customized settings save time and effort
- Advanced scanning options, including color, enhance communications
- Streamlined output generation increases productivity
- Océ Power Logic® controller for centralized process management
- Océ Account Center turns printing costs into income
- Breakthrough Print Quality
- Océ Image Logic® technology offers superior copy quality
- Zero warm-up time means no waiting for your prints
- Proven reliability minimizes downtime

LARGE FORMAT PRINTS

Available in Our Reprographics Department

“BROWNIE”
Delivery Driver

Océ TDS600 Multifunction System

Simple, efficient, and reliable print, scan, and copy solution.

Highlights

- Productive system with 7 D-size prints per minute
- Dependable, proven large format production system
- Flexible alternatives – Printer, Copier, or Multifunction system available in 2-4 roll with field upgradeability
- Great output quality with 400x800 enhanced resolution printing technology
- Optimized workflow with intuitive software options
- Small footprint with integrated output receiving tray on top of system

Features

- Productive Printing and Copying
- Flexible enough to be placed in a workgroup or central repro department. With a range of features and options, the Océ TDS600 fits in with just about any workflow.
- Flexible output options. The Océ TDS600 media options are exceptional and easy to use.
- Distinctive scanner streamlines copying and scan-to-file
- Designed to optimize your workflow
- Proven reliability minimizes downtime
- Océ Image Logic® technology offers superior copy quality
- Océ Account Center turns printing costs into income
Organizations that find it difficult to control and allocate costs will find that the optional Océ Account Center software is a reliable and easy-to-use tool for cost recovery. You can track all the printing, copying and scanning activities of the system and allocate the costs to the users, departments and projects to which they belong. Océ Account Center ensures reimbursement by turning those costs into chargeable income.

Océ TDS700 Multifunction System

Efficient, productive printing, copying & scanning

Highlights

- Highly productive system with 9 D-size prints per minute and capable of running, uninterrupted, for over 10,000 square feet!
- Unique, long-term investment – Ideally fulfills your current requirements and field upgradeable for your changing needs
- Flexible and configurable to your environment - 2-6 roll plus cut sheet tray and two scanner options – productive high volume monochrome or color scanning
- Superior output quality with 600x1200 dpi pico printing
- Optimized workflow with intuitive software options
- Small footprint with integrated output receiving tray on top of system

Features

Designed with streamlined production in mind, users spend less time printing, copying and scanning with the following distinctive features:

- 6 roll media capability and toner loading-while-printing offer over 10,000 square feet of uninterrupted printing capability without the need to stop the system to load toner or paper.
- Instant-on printing capability with the revolutionary Océ Radiant Fusing Technology ensures that output is received when you need it without waiting for warm up time.
- The integrated output receiving tray on top of the system takes up less space and neatly stacks collated output for easy access and no post process sorting required
- Ergonomically designed media roll loading including automatic cutters in every drawer and a media roll rest ensures that employees can quickly and easily load media.
- Robust software applications for print submission and job management ensure control of the system.
- Intuitive user panels and controls ensure that users get the output they need with minimal effort.
