

## ***CRAIN*** **TRIPODS**

Tri-Max tripods are certified to meet or exceed ISO Certification Standards - making it the only tripod on the market with certifiable accuracy. All new Tri-Max tripods come equipped with a serial number on the hinge assuring you that the tripod has successfully passed all necessary testing and is certified to meet the ISO 12858-2-H standards.

Crain has now put the Tri-Max to the ultimate test, the ISO 12858-2-H. Not only did we test the Tri-Max, but we tested nine of the best selling tripods on the market. The results were gratifying; the Tri-Max was the only tripod that passed the test. We're so convinced of the accuracy and stability that the Tri-Max can provide, we back it up with a 5-year warranty.
